

Secure hard drive and media destruction factsheet

Protecting sensitive data does not stop when hard drive devices reach the end of their lifespan, or when media items are no longer needed.

Minimise the risk by permanently destroying hard drives and other media items so your sensitive information is beyond recovery.

What type of data storage media should I securely destroy?

Hard drives

Floppy disks

USB drives

Optical media

CDs/CD-ROMs

DVDs/DVD-ROMs

Blu-ray

HD-DVDs

Magnetic backup tapes

DLT

Mini cartridges

Cassettes

Videotapes

Shred-it's chain of custody process for permanent hard drive and media destruction

- Barcode scan at every touchpoint for a complete chain of custody
- GPS-tracked fleets ensure end-to-end tracking
- Locked trucks
- Secure, monitored facilities
- Secure consoles
- Certificate of Destruction certifies that your material was destroyed compliantly
